TEA DRIPPER

SPECIAL FEATURES

1. Pour tea with the press of a switch.
2. Gradual drip into ice-filled server allows for faster cooling.
3. Server spout is especially contoured to hold ice when pouring.

TASTE

Regular tea pots cause stronger tea to concentrate in the bottom, where it settles. For this reason, the traditional method of serving Japanese tea is to pour a bit into every cup, then pouring into each cup once more. The Tea Dropper pours from the bottom, which allows for an even pour in one step.

TEA POT

With a heatproof glass teapot, you can enjoy the variety of colors in the tea. It comes with a large tea strainer so that the tea leaves can expand easily.
