

V60 Dripper SUIREN [睡蓮]
[water lilies]

An assembly-type coffee dripper that features the V60 transparent dripper's symbol "spiral ribs".

new

V60 Dripper SUIREN
VDSU-02-TB

C/T24 031371
W130 x D125 x H108mm
1 ~ 4 cups
With dripper holder
Material: Rib/PCT resin
Ring dripper holder/polypropylene

You can remove the dripper holder and place it directly on the server.

Attach 12 ribs.
(Removable)

Comes with a dripper holder,
so it is stable even with small
diameter mugs.

Rib parts are available in 6 colors, so you can customize it to your favorite color. Each dripper uses 12 ribs.

When brewing with a coffee scale.

360 size uses 3 fingers, 600 size uses 4 fingers. It has a large handle that allows for a firm grip.

A sharp spout.

V60 Barista Server

A new standard coffee server born from the voices of baristas.

This simple server was born from the voice of Barista to make it easy to hold, mix, and pour.

To enjoy the liquid color, we have eliminated the markings and markings from the sides.

This server combines the cuteness and dignified beauty of the coffee accumulated in the server that looks delicious.

With a diameter of 80mm, it is compatible with various extraction equipment and is easy to clean after extraction.

For microwave

Do not expose to open flames

Practical capacity 600mL
1 ~ 5 cups

Easy and delicious even for first timers.

"Pegasus Dropper" supports the first step of hand dripping. A trapezoidal coffee dropper with two small holes and spiral ribs, aimed at hand drip beginners.

PEGASUS DRIPPER

A guide scale that allows you to measure coffee powder.

A peephole allows you to see the amount of extraction.

The bottom shape allows for direct dripping from a thermal bottle.

Spiral ribs make it easy for coffee powder to expand, and two small holes make it easy to improve flavor reproduction.

PEGASUS SERVER

Easy-to-remove lid knob.

Flip the lid over and use it as a simple drip tray.

Handle design allows you to hold it in a variety of ways.

Large, easy-to-grip handle.

CERAMIC COATING

Ceramic coating series that maintains the delicious taste of freshly brewed coffee.

The inside of the mug and pot is coated with ceramic. You can enjoy the delicious taste of freshly brewed coffee for a long time because it does not have the characteristic metallic odor that is characteristic of stainless steel. It doesn't get dirty easily and is easy to clean. The main body is made of stainless steel and has a vacuum insulated structure that maintains a delicious temperature.

With ceramic coating, you can enjoy the deliciousness of freshly brewed coffee for a longer period of time.

Vacuum insulation structure allows you to maintain a delicious temperature for a long time by keeping it hot or cold. It also prevents condensation from forming.

Comes with a convenient scale that lets you know how much to brew.

The ceramic coating gives it a pottery-like texture.

Filter-in Carafe

Carafe-shaped cold brew tea bottle.

Following the filter-in bottle, we now have a carafe-shaped cold brew tea bottle. The filter and spout are integrated, making it easier to clean. The capacity is 1,000mL at the bottom where the spout fits. (Printed scale is 900mL)

Just add tea leaves and water to the bottle.

Cleaning is easy as the filter and spout are integrated into one part.

HARIO COLORS

"HARIO COLORS" is a series of color glass made of heatproof glass proposed by HARIO.

The tea and coffee server and cold brew pitcher have lids with mesh filters, so you can put tea leaves in and pour it out.

The tea and coffee server can also be used as a coffee server by removing the lid and placing a dripper on it.

A total of 4 items, including stacked mugs and canisters, will add color to your tabletop.

A compact pickle maker made of heatproof glass.

Tsukemono are Japanese pickled vegetables, eaten as tasty side dishes with a meal, or when having drinks.

In Japan, many people make their own tsukemono, for example from ginger, daikon (Japanese radish), plum, cucumber or Chinese cabbage. HARIO's Tsukemono Glass Slim allows you to easily prepare traditional tsukemono, or to try and create your own recipes!

The glass is heatproof, which also means that smells and colours from food won't easily stick to it, making it ideal to reuse again and again!

For hot drink

Crafts Science

The history of HARIO, Japan's only domestic heat-proof glass maker, began with its production of laboratory instruments.

Through repeated trial and error, HARIO achieved the accuracy, durability and practicality demanded of rigorous laboratory experiments and earned the trust of researchers around the world.

In 2021, to mark the 100th anniversary of our founding, we condensed the laboratory equipment expertise we developed early on to create a new series of "Crafts Science" drinkware.

This drinkware embodies the history of HARIO by melding our advanced processing technology, craftsmanship and functional scientific design.

Coffee making is a science. When someone grinds beans, boils water and extracts coffee, the taste greatly varies depending on the amounts, temperatures, timing and instruments used.

Spout sharpness, operational stability and molding precision all make a difference.

The scientific thinking HARIO developed at its inception now makes it possible for perfectionists to achieve their ideal flavor.

Crafts Science - Drinkware born from 100 years of craftsmanship and science

May wonderful coffee continue to enrich our lives.

Climate models indicate that global warming will reduce the amount of land suitable for coffee bean cultivation to 50% of the current level by 2050. With the BATON series, we have reduced the amount of plastic use by about 50% by using natural materials that would otherwise be discarded, such as extracted coffee grounds.

BATON is a series of paperless drippers and other eco-conscious products.

The baton is in our hands — it is our hope that we can do our part to ensure that our lives continue to be enriched by coffee for many years to come.

Mesh / Polyester

Adjust fire power via dial
Turn the dial to easily adjust the flame power suitable for heating and extraction.

The heater and glass ball are separated, so the ball can be washed.

The joy of analog siphons has been recreated with an electric type.

Electric siphon coffee maker that can be used without flame.
The installation space is about A5 size, and it is compact enough to take up much space even in the kitchen.
You can adjust the flame power via the dial, and choose the suitable heat power for heating and extraction.

Although it is an electric siphon, it has a classic feel and cuteness.

Electric Coffee Syphon **ECA-3-B**

C/T6 041035
W180 x D150 x H270mm
Practical capacity 360mL 3 cups
Includes 50 sheets paper filters.

Material: Upper and lower bowl/heatproof glass
Heater body cover / polypropylene
Heat plate / aluminum
Lid / Polypropylene Handle / Phenolic resin
Filter set/stainless steel

AC 100V 50/60Hz 350W

① コーヒーの粉量を測り抽出比率(左上)をキーボタンで調節し、総投湯量(右上)が自動で表示されます。

② TIME MODE ボタンを押し、抽出比率と総投湯量を確定させます。同時にパーセント表示が点灯し、オートタイマー待機状態になります。

③ パーセント表示が100%になると抽出完了です。

You can see the extraction progress at a glance. A coffee scale that increases recipe reproducibility.

When brewing coffee, you can enjoy the change in flavor by adjusting the amount of powder and pouring water depending on the origin of the beans and the degree of roasting, but this requires various calculations and recipe management. It gets complicated. Polaris mode supports ideal extraction by displaying percentages. Even if the amount of powder or total amount of hot water changes, there is no need to calculate the amount of hot water for each pour. You can easily check the pouring ratio of each pour, making it easier to reproduce your ideal recipe.

- Polaris mode: A mode that assists in ideal extraction using the ratio function and percentage display.
- Ratio function: Register the ratio of powder amount: hot water amount on the scale in advance and automatically display the required amount of hot water to pour for the amount of powder.
- Percentage display: You can check at a glance what proportion of hot water is being poured to reach the amount determined by the ratio function.
- Auto timer: The timer starts automatically as soon as you pour hot water.
- Classic mode: Only time and weight are displayed.
- Available in two colors: black and white.

Coffee Scale Polaris
CST-2000-W

027107

Simple structure with only a power button and extraction button. Operation is via touch panel.

Shower style hot water pouring.

MUGEN Coffee Maker is a coffee maker equipped with hand drip recipes.

Kasuya Barista's recommended recipe for the V60 single-extraction dripper MUGEN released in 2021 can be reproduced with a coffee maker. Equipped with a recipe for pouring 300mL of hot water in about 20 seconds. We focused on compact size.

The dripper is V60 single extraction dripper MUGEN, and the server is a beaker server.

MUGEN Coffee Maker EMC-02-B

C/T6 704022
 W117 x D190 x H311mm
 Dripper: 1 ~ 2 cups
 Server: practical capacity 300mL
 Material: Main body/polypropylene, iron, acrylic resin,
 Silicone rubber · PBT-GF30
 Server/Heat-resistant glass
 Dripper/AS resin/polypropylene
 AC 100V 50/60Hz 600W

It has a cleaner function that sends air inside by pushing the lid from above and pushes the fine coffee powder into the powder receiver.

Equipped with a static electricity removal function that prevents coffee powder from scattering.

An electric coffee grinder with an internal static electricity removal function and a lid with a cleaner function.

You can adjust the grind to suit your taste, from medium-fine grinding to coarse grinding, which is perfect for hand drip.
(39 steps adjustment)

Equipped with an internal static electricity removal function to reduce scattering of coffee grounds. Also, the lid has a cleaner function, making it easy to clean.

Conical stainless steel mortar.
