

Cook

A glass lid rice cooker in which you can see the flavor

By increasing the thickness of the glass lid rice cooker, we made fire adjustment unnecessary, which was said to be the difficult part of cooking rice over a direct flame.

The whistle on the top of the lid will let you know when to stop the flame. Once it whistles, stop the heat and let it steam for 15 minutes. Using the steam heat stored in the glass lid rice cooker will draw out flavors from the rice.

The lid is a heatproof glass. Being able to see the rice cook is exciting and also worry free.

All parts are made in Japan. Use this glass lid rice cooker with a glass lid to enjoy the rice flavors from a direct flame, inherited from ancient times.

For open flames

Medium flame + steam for 15 minutes

new

GOHANGAMA Glass Lid Rice Cooker
GNR-150-B-W

C/T6 803640
W210 x D174 x H190 φ 150mm
Capacity : 1-2 go (Rice 150-300g)

new

GOHANGAMA Glass Lid Rice Cooker
GNR-200-B-W

C/T4 803657
W270 x D230 x H210 φ 200mm
Capacity : 2-3 go (Rice 300-450g)

The hexagonal shape of the knob on top of the lid prevents it from rolling.

The lid can be placed upside down.

Cross-sectional view

The thick bottom of the rice cooker will adjust the heat that is transferred to the rice.

This rice container keeps the flavors as is.

Since the container has water-absorbing properties, it appropriately absorbs excess moisture from the rice, making a flavorful rice where you can see each separate grain. When reheating in the microwave, the water that was absorbed in the container gets released, forming a soft rice.

Knob / Polypropylene, Silicone rubber

An IH rice pan coated with a non-stick polymer keeps rice from sticking to the pan.

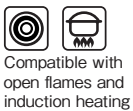

Four-layer Structure + Non-stick Coating

The four-layer stainless steel and aluminum pan conducts heat evenly to cook delicious rice. Since the inside is coated with a non-stick polymer, rice hardly sticks to the pan. The pan can be used for simmered dishes as well.

An IH stainless steel Yukihira pan with beautiful hammer marks.

Various useful recipes are included as a guide. Because the lid is made of heat-resistant glass, you can see the inside while cooking and know when the dish is ready to eat.

Glass overnight salting bowls easily display your favorite vegetables

Due to its clear and simple design, the glass overnight salting bowl enables you to see the colorful vegetables, which makes it look nice even on the dinner table. Because it has a lid, you can refrigerate it directly after salting. The bowl is made out of heatproof glass, and it prevents colors and smells to stain. This product comes with Chef Akiko Nakayama's recipes.

For microwave

Lay the weighted piece.

Use the lid for storage.

Microwave safe.

Material: Cork

Heatproof glass storage container round / square

The heat-resistant glass storage container/circle can be used in the microwave. Available in 3 sizes to suit your needs, such as storing leftover side dishes or making ahead side dishes. The corner can also be used in the oven by removing the lid, allowing for a wider range of uses for cooking and storage.

Oven OK with lid removed

Microwave safe including lid

Highly airtight

Pull up the air valve and put it in the microwave

Press down the air valve and save

Pull up the air valve to open and close the lid.

■ Heatproof Square Sealed Glass Container

Sealed storage container made of heatproof glass.
The corners have gaskets, so they are highly airtight.
You can use it in the microwave by pulling up the air valve on the lid.
To save, push the air valve down. You can also remove the lid and use it in the oven.
