2025 New Products

A ceramic coffee mill that gives off the warmth of wood.

Available in two sizes to suit your needs. Ceramic mills are less likely to generate frictional heat and bring out the flavor of the coffee beans. You can adjust the grind to your liking and enjoy the aroma of freshly ground coffee.

new

Coffee Mill Cube

Shaft and handle: Stainless steel
Hopper: Polypropylene

new

Coffee Mill Cube
CMCB-4

C/T12 708686
W170 x D105 x H210mm
Coffee beans 48g for 4 cups

A coffee grinder with a stainless steel burr.

This coffee grinder features 90 adjustable settings, allowing precise control from fine to coarse grinds for various brewing methods. Its high-hardness stainless steel burrs ensure uniform grinding, while the bearing system stabilizes the shaft for smooth operation. Designed for a comfortable grip and effortless grinding, it enhances your coffee experience.

Walnut Wood Series

Walnut wood, known for its beautiful grain, is a premium material often used in high-end furniture.

We are introducing a coffee item series that combines this high-quality walnut wood with heat-resistant glass and other materials.

Each piece is carefully handcrafted by skilled artisans, allowing you to enjoy a warm and enriching coffee experience with the natural charm of walnut wood.

HARIO COLORS

"HARIO COLORS" is a series of color glass made of heatproof glass proposed by HARIO.

The tea and coffee server and cold brew pitcher have lids with mesh filters, so you can put tea leaves in and pour it out.

The tea and coffee server can also be used as a coffee server by removing the lid and placing a dripper on it.

A total of 4 items, including stacked mugs and canisters, will add color to your tabletop.

Crafts Science

唯一の国産耐熱ガラスメーカー HARIO の歴史は、理化学器具の製造から始まりました。
厳密な理化学実験の現場で求められる正確性、耐久性、操作性をかなえるため、多くの試行錯誤が繰り返され、
世界の研究者たちが信頼を寄せる HARIO クオリティが確立されました。

創業 100 年を迎え、HARIO の原点である理化学器具の品質を凝縮したシリーズ「Crafts Science」。
クラフツマンシップに裏打ちされた確かな加工技術と、機能性を追求する科学的デザインが融合した、
HARIO の歴史を体現するドリンクウェアの数々にご注目ください。

コーヒーは科学だ。
豆を挽き、湯を沸かし、抽出する。
そのひとつひとつの分量、温度、速度、
そしてそのための器具によって、仕上がりが大きく変化する。

大切なのは、キレの良い注ぎ口、安定した操作性、精密な成形技術。
HARIO の原点、理化学器具の為の科学的思考が、理想の味を叶える。

100 年のクラフツマンシップとサイエンスから生まれたドリンクウェア。

これからも、すばらしいコーヒーが共にある
カラフルで豊かな暮らしのためにできること

世界中の農園から、私たちの元へ届けられるコーヒー。
それぞれが持つ多様な香りや味わいを、私たちは日々楽しんでいます。
しかし、地球温暖化によってコーヒーの栽培環境に変化が起っており、今後生産量の減少と
価格高騰が懸念されています。
「BATON シリーズ」は、廃棄してしまう抽出後のコーヒー粉などの天然系素材を使用し、
プラスチックの使用量を約 50% 削減しました。また、ペーパーを使わないドリッパーなど、
環境に配慮した製品のシリーズです。
これからも、すばらしいコーヒーが共にある、カラフルで豊かな暮らしのためにできること。
はるか昔から繋がれてきたバトンを、これからもずっと、未来へ繋いでいきたいと願っています。

Electric Kettle Lyra

Introducing a new electric kettle for drip coffee that is designed to be easy to use and functional.

Lyra is packed with multiple functions, including temperature adjustment in 1° C increments, one-touch boiling, a stopwatch, and a timer. The lightweight design and handle that fits comfortably in the hand reduce the strain of dripping, while the narrow nozzle allows for delicate pouring. The simple and beautiful design blends naturally into your everyday life. Why not make your ideal coffee time a reality with Lyra?

Lightweight design

The unit weighs approximately 0.53 kg, making it one of the lightest electric coffee kettles in its class. Reduces the strain on your hands when dripping.

Narrow nozzle for delicate pouring

The long, narrow, curved spout allows you to get close to the coffee grounds, allowing you to pour as delicately as a professional.

Easy-to-grip handle

The handle is designed to fit a variety of grip styles. There are no corners, so it feels comfortable in your hand.

Protective cushion

The bottom of the unit is fitted with a silicone rubber cushion to cushion the impact when placed down.

Slim body

The slim design makes it difficult for the water inside to be stirred during use, and the centrifugal force caused by stirring is less likely to be applied, so the center of gravity is stable.

Multifunction

Stopwatch, timer, KEEP function, °C/°F switchable, one-touch boiling, preset temperature customizable, mute function, etc.

A new coffee scale to set you free of troublesome calculations POLARIS - The percentage display becomes your North Star, guiding you to delicious coffee.

POLARIS is a smart coffee scale capable of calculating the coffee extraction ratio and visualizing the extraction progress. You can complete the extraction ratio calculation to prepare the recipe right on the scale. The scale accurately calculates the amount of hot water you should pour, reducing mistakes in making your coffee too strong or too weak. The percentage display allows you to see how much hot water you should pour at a glance. Furthermore, this scale no longer requires the amount of hot water (g) to be poured per pour to be calculated, which was previously necessary. Even if the amount of coffee used changes, the percentage display remains unchanged, making it easier to manage recipes.

- **Polaris mode...** This mode assists ideal extraction with the ratio function and percentage display.
- **Ratio function...** The ratio of powder amount: hot water amount is registered on the scale in advance, and the necessary amount of hot water to be poured for the amount of powder is automatically displayed.
- **Percentage display...** You can see at a glance how much hot water you have poured up to the amount of hot water that should be poured calculated by the ratio function.
- **Auto timer...** The timer starts automatically as soon as hot water is poured.
- **Classic mode:** Displays time and weight only.
- **Available in two colors:** black and white.

Coffee beans 40g

Material: Body, powder tray, lid: Aluminum

Mill: Stainless steel

Lens: Heat-resistant glass

Cover, non-slip: Silicone rubber

AC100 ~ 240V 50/60Hz 150W

This grinder can be used for both grinding beans and measuring drip.

You can set the amount and grain size of the coffee powder to be ground. You can save up to four settings (amount + grain size) of your choice.

The scale is automatically charged when connected to the main unit.

A coffee grinder with a scale that automatically measures and grinds the amount of coffee powder.

It is equipped with a function that automatically measures a preset amount of coffee powder and grinds it as is. In addition, the scale part can be removed from the main body and used as a drip scale on its own. The mill uses flat blades that allow a wide range of grind sizes to be set and ensure a uniform grind. The grind size can be adjusted in 50 steps by digital control, from a fine grind suitable for home espresso to a coarse grind for a French press.

W180 x D150 x H270mm
Practical capacity 360mL 3 cups
Includes 50 sheets paper filters.
Material: Upper and lower bowl/heatproof glass
Heater body cover / polypropylene
Heat plate / aluminum
Lid / Polypropylene Handle / Phenolic resin
Filter set/stainless steel
AC 100V 50/60Hz 350W

Simple structure with only a power button and extraction button. Touch panel operation.

Shower style hot water pouring.

MUGEN Coffee Maker is a coffee maker equipped with hand drip recipes.

Kasuya Barista's recommended recipe for the V60 single-extraction dripper MUGEN released in 2021 can be reproduced with a coffee maker. Equipped with a recipe for pouring 300mL of hot water in about 20 seconds. We focused on compact size.

The dripper is V60 single extraction dripper MUGEN, and the server is a beaker server.

MUGEN Coffee Maker EMC-02-B

C/T6 704022
W117 x D190 x H311mm
Dripper: 1 ~ 2 cups
Server: practical capacity 300mL

Material: Main body/polypropylene, iron, acrylic resin,
Silicone rubber · PBT-GF30
Server/Heat-resistant glass
Dripper/AS resin/polypropylene

AC 100V 50/60Hz 600W

We pursued the deliciousness of "hand drip".

The V60 Coffee King 2 coffee maker pursues a taste as close as possible to hand drip, and the conditions for brewing delicious coffee are programmed into the machine. Since it can extract coffee consistently at any time, you can easily enjoy the taste of coffee brewed with the V60 hand drip at home.

V60 Coffee Maker

V60 Coffee King 2 Coffee Maker EVCM2-5TB

C/T2 403215

W165 x D223 x H318mm

Min capacity 300mL Max capacity 750mL

2 ~ 5 cups

Measuring spoon VCF-02W 40 sheets included

Material: Main body/polypropylene/silicone rubber/
Nylon/ABS resin/stainless steel
Server body/Heat-resistant glass
Dripper/PCT resin
Server lid, handle band, spoon/
Polypropylene

AC 220V-240V 50/60Hz 750W

Easy operation. Start by power switch → number of cups button → start brewing.

21 spouts that allow you to pour hot water all over your coffee. Drip finishes in about 3 minutes.

Keep warm function: Keeps it warm for 30 minutes after brewing.

High temperature extraction system

The water in the tank is circulated and heated to 65°C, then passes through the heater and into the extraction outlet. The hot water coming out of the extraction outlet is at a high temperature of around 95°C, and inside the dripper it becomes the appropriate temperature of around 93°C. The hot water steams the coffee grounds for about 30 seconds, and the drip process is completed in about 3 minutes. The water tank has a two-layer structure that provides excellent heat retention.

Electric Coffee Grinder

Electric Coffee Grinder Switch **EMCS-5-W / EMCS-5-B**
